Instructions

Do you remember playing tic tac toe for hours as a kid?

It's so simple and yet so fun! So, we've turned this childhood pastime into sexy bedroom games for two!

BEFORE YOU START

You will need to print and cut out your reward cards and your playing pieces before starting and the only other thing you will need is to have your favourite treat handy as one of the sexy reward cards leads to some taste testing. Yummy!

HOW TO PLAY

Each square on the tic tac toe board has an action on it. Once you pick your spot, both of you have to complete the action before moving on to the next turn.

And, just like the original game, get three of your pieces in a row and you win!

When you're an adult the game often ends in a draw so agree on an odd number of rounds to play before you start. Or for a little more difficulty and spice, add a blindfold for one of you into the mix and try getting three in a row without being able to see the game board!

After all the rounds are completed, the winner gets to pick one of the sexy action reward cards as their prize! The best part about this is, no matter who wins, you both win!

We have also included some blank sexy reward cards so you can tailor the prize to your liking!

This is a game you'll want to keep around for a rematch so keep it handy in your bedside drawers for a little before bed fun and action!
